

World Wide Cargo Reefer Containers: 20 Footers & 40 Footers

Gives you the opportunity to customize the interior of the Reefer to suite your specific needs. Because the interior walls are adjustable, they can be spaced to meet your needs. If you need 10% of the reefer to be frozen and 30% to be chilled... no problem, and vice versa, if you need 25% of the reefer to be frozen and you need 75% to be chilled... again, no problem. The interior is adjusted to your requirements.

COMPARTMENT #1

It's a FREEZER compartment.

Temperatures can be set at a range of:

-10°F to 32°F

(for ice cream, frozen meats, seafood, etc.)

COMPARTMENT #2

It's a COOLER compartment used for chilled cargo. Temperatures can be set at a range of:

38° F to 60° F

(for dairy products, eggs, vegetables, etc.)

COMPARTMENT #3

It's a DRY compartment used to transport any type of dry cargo (not hazardous nature). Some shippers do not ship dry products, so they use this area to ship additional chilled cargo.
